

General Environmental Incident Summary

Incident: 1830 **Date/Time Notice:** 12/3/2012 0930 **DEM Incident No:**
Responsible Party: BNSF
Date Incident: 12/3/2012 **Time Incident:** 0835 **Duration:** 1 hours
County: Ward **Twp:** 155 **Rng:** 82 **Sec:** 22 **Qtr:** NE
Lat: 48.23288 **Long:** -101.19850 **Method:** Derived from TRS
Location Description: 6400 4th Ave NE, Minot - Near Gavin Yard Tower

Submitted By: Garey Ketcham **Affiliation:**
Address:
City: **State:** **Zip:**

Received By: Brad Torgerson
Contact Person: Michael Woolridge
80 44th Ave NE
Minneapolis, MN 55421

Distance Nearest Occupied Building: 0.1 Miles

Type of Incident: Tank Leak

Description of Released Contaminant: Diesel Fuel

Volume Spilled: 300.00 gallons **Ag Related:** No

EPA Extremely Hazardous Substance: Unknown **Reported to NRC:** No

Cause of Incident:

Leak developed in the bottom of a railroad tanker car.

Risk Evaluation:

None

of Fatalities: **# of Injuries:** **Affected Medium:** 03 - soil

Potential Environmental Impacts:

Diesel fuel impacts to soil and railroad ballast only at this time. No water nearby.

Action Taken or Planned:

Sorbent pads placed - Pinnacle Engineering enroute to remediate release.

Wastes Disposal Location: Unknown at this time.

Agencies Involved: NDDDES

Updates

Date: 12/3/2012 **Status:** Reviewed - Follow-up Required

Notes:

Met Matt Richardson at location in Gavin Yard 13:00, 12/6/12, and viewed impact area. Length of side track approximately 70 ft long with diesel impact. Some soil/ballast has been removed, but a good deal of the product had soaked into the trackage. Plan for 12/2012 was to apply Micro-Blaze and again in spring 2013. Recommended that the Dec. application be canceled, as soil temperatures already below 54 degrees F. Wait until soil temperatures above 54 degrees in spring of 2013 and apply then, and keep moist. In meantime, send email/letter stating actions to date and plan for spring with a 'do before' date.
